

Darek Mielniczek

Shopify Developer | E-commerce & Front-end

+48 600 625 431 • darek@mielniczek.net • Bystrzyca Kłodzka, Poland

SUMMARY

I have over 20 years of experience in web development, currently specializing in Shopify — custom themes, migrations, API integrations, and performance optimization. I build user-friendly e-commerce experiences using Liquid, modern JavaScript, and React.

For the last 10 years, I have worked fully remotely, both through agencies and as an independent freelancer. I am used to owning projects end-to-end while staying in close, honest communication with the client and the team.

EXPERIENCE

WeCanFly – Shopify Premier Agency / Shopify Developer

2023 – 2026 • Remote

Shopify development for international e-commerce brands, from US retail stores to global FMCG companies (UK market). I customize and extend themes in Liquid, develop new storefront features, and solve problems that standard apps can't handle — including a product configurator, subscription migration tooling, and API automations.

I advise clients on choosing and configuring the right tools for their store, and build marketing automations with Klaviyo and Shopify Flow. I take part in client workshops, analyze business requirements, and recommend solutions tailored to real needs. I also use AI daily to speed up development, data transformation, and debugging.

DCNY / Front-end Developer

2015 – 2023 • Remote

For over 8 years, I worked as a front-end developer for a New York-based agency, serving clients on the US market. I built WordPress themes from scratch, developed custom web applications, SPAs, and landing pages, and occasionally handled backend and API tasks in Laravel.

During this time, I also set up and developed multiple Shopify stores for US clients — my first hands-on experience with the platform, which later became my main specialization.

A significant part of my role involved performance optimization (Core Web Vitals), SEO, and long-term website maintenance. I also worked with marketing tools such as HubSpot, Campaign Monitor, and Google Analytics.

Crazybeaver.net / Co-Owner & Front-end Developer

2006 – present • Szczecin & remote • own business, now occasional projects

Our team launched over 100 websites for clients ranging from small businesses to government institutions and universities. I wore two hats: client acquisition, estimation, and billing on the business side, and full-stack development (WordPress, Drupal, Joomla) on the technical side. Today, I run it as a side business, taking on occasional projects.

Infoludek.pl / Webmaster & Full-stack Developer

1999 – 2005 • Szczecin

My first steps in web development — from developer in the sports section of a
